PROVIDING A MORE TAILORED EXPERIENCE

Cookies are computer files that provide you with a more personalised web browsing experience. Below, we've answered the key questions about how cookies work and how we use them to improve your web experience.

WHY DOES WALTER SCOTT USE COOKIES?

We use two different types of cookies on our websites: session cookies and persistent cookies.

Session cookies are temporary files that only remain in the cookie file of your internet browser until you leave our website. These cookies are useful as they carry information across the pages on our website, which means you do not have to re-enter personal information each time you visit a new page.

Persistent cookies, in contrast, remain in the cookie file of your browser even after you leave our website and after the browser is closed. Persistent cookies offer many benefits, including:

Identifying you as a unique visitor when you return to our website. Remembering the information on our website that you are most interested in.

Helping us to understand how you use our website so that we can improve the structure and improve the overall visitor experience.

WHAT INFORMATION WILL COOKIES OBTAIN FROM MY COMPUTER?

Cookies are small files placed on your computer by our website that contain basic information such as the type of internet browser you are using or your computer's IP address. They will only recognise other preferences (such as passwords) if you allow them to.

None of this information is stored by us and only our website can read the information contained in our cookies. In particular, you should note that no personal information is collected. Cookies also cannot by themselves be used to identify you instead they only allow us to monitor visitors to our website anonymously.

CAN I STOP COOKIES FROM HAVING ACCESS TO MY COMPUTER?

Most internet browsers are initially set up to accept cookies. However, you have the ability to disable cookies if you wish, generally through changing your internet browser's settings. You may also be able to change the settings to only enable certain cookies to be accepted by your browser. Please refer to the "help" section of your browser.

However, you should note that our cookies are not harmful in any way and are only used to enhance your experience on our website. If you disable cookies it may mean that not all services on our site or on other sites will be available.
